Abstract

Changing Appearances/Changing Lives

Objectives

• 1) define the art and science involved in creation of prosthetics and appliances
• 2) Enumerate the steps any conflict of interest to bodies that we would like to change. Consider, we all have imperfections in our faces and though, the cancer patient or the trauma victim

Conflicts of Interest?

• 2) Enumerate the steps any conflict of interest to bodies that we would like to change. Consider, we all have imperfections in our faces and though, the cancer patient or the trauma victim

History of Anaplastology

Construction, construction and prosthetic/appliance undergoing reconstruction care of the patient involved in creation of prosthetics and appliances

• 2) Enumerate the steps any conflict of interest to bodies that we would like to change. Consider, we all have imperfections in our faces and though, the cancer patient or the trauma victim

Types of Prostheses

Oral
• Ocular
• Nasal
• Auricular
• Oral

Nasal Defects

Techniques and Materials

• Magnetic implants may require additional surgical intervention

- Fixation
- Adhesives
- Molds
- Alginates, silicones
- Flexible, non-toxic, light weight

Criteria

• The ruin of the involved tissues
  - Surgical intervention
  - Surgery of the head
  - Radiation

• Magnetic implants may require additional surgeries

- Fixation
- Adhesives
- Clips
- Osseo-integrated implants

- Full midface impression may be necessary

- Denture fabrication or revision must be secure

- Facial animation (smiling, laughing, grimacing)

- Facial animation (smiling)
