Feature

Otolaryngology Nurses’ Awareness of Clinical Practice Guidelines
Helene J. Krouse, PhD, ANP-BC, CORLN, FAAN
Clinical practice guidelines (CPG) are developed to inform clinical decision-making and standardize care based on scientific evidence, benefits and harms of treatment, and patient preferences to achieve optimal health outcomes. This survey study explored the level of awareness of otorhinolaryngology (ORL) nurses in using CPGs in clinical practice.

Early Detection and Aggressive Management of Otologic Pathologies in Children with Down Syndrome
Jessica Hoffner, MSN, FNP-BC, CLC

Pain Management Interventions for Needle Stick Procedures: An Ambulatory EBP Project
Michele Farrington, BSN, RN, CPHON; Trudy Laffoon, MA, RN-BC; Cindy Dawson, MSN, RN, CORLN and Carmen Kealey, MA, RN

Pain is a prevalent global health concern, and pain assessment and treatment is a patient right. This evidence-based practice project targeted translating pain management interventions into practice for adult and pediatric patients undergoing needle stick procedures in ambulatory settings.
